

REGENERATE YOUR TRANSFORMER OIL USING

YOUR EXISTING PURIFICATION PLANT!

LATEST DEVELOPMENT FROM FLUIDEX MADE EVEN EASIER THAN BEFORE!!!

- *Do you own your own purifier/degasser?
- *Do you have old/aged transformer oil in your transformer?
- *Do you repair transformers and have old/aged transformer oil in storage tanks?
- *Do you want to extend the life of your transformer?
- *Do you have an interest in conserving transformer oil?
- *Do you have an interest in preserving our environment?
- *Do you want to extend the usage and application of your existing oil purification plant?

If you answer **YES** to any of the above questions, you need to invest in a FILTERALL regeneration plant attachment immediately.

FILTERALL new RPA (regeneration plant attachment) was designed to work in conjunction with your existing purification plant to regenerate transformer oil to like new condition.

Simply, the RPA unit contains a highly active and specialized absorptive media which when the oil is pumped through will return the oil to like new condition. As with all absorptive media there are limitations to the amount of oil that can be treated. This is no problem with the FILTERALL RPA unit, because with a simple press of a button the media is fully cleaned in the plant. All the contaminants which the media removed from the oil and transformer is stored in a separate tank in the plant.

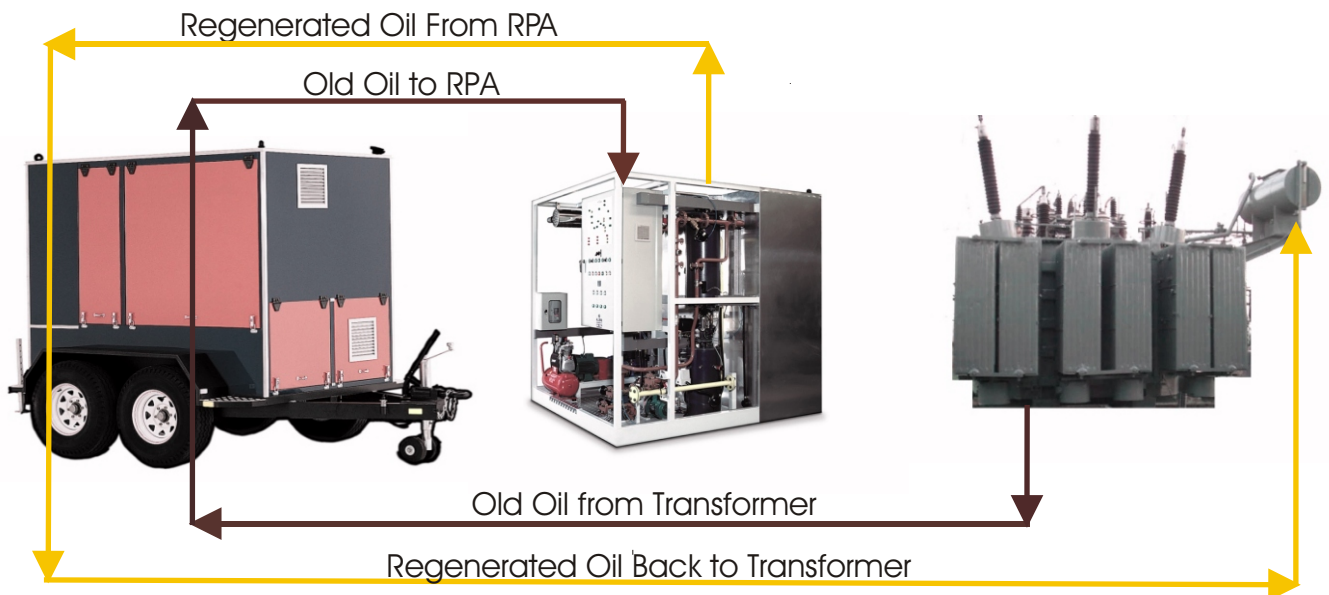

NEW RELEASE

Typical Filterall Regeneration Plant Attachment (RPA) Unit

ADVANTAGES OF OWNING A FILTERALL RPA UNIT

- * The unit works in conjunction with any make of oil purification plant.
- *The absorptive media is automatically cleaned in the plant and can be used over and over again to treat transformer oil.
- *Instead of changing oil in the transformer, regenerate/reclaim the oil to like new condition.
- *By regeneration the oil in transformers, no exposure of the core to atmosphere takes place.
- *In some instances work on energised transformers can be done.
- *One operator for both the purification and FILTERALL RPA plant.

NO DUMPING OF OIL SOAKED FULLERS EARTH REQUIRED

Your Existing Purification Plant (any make) will pump, heat, filter and degas the oil

Filterall RPA Unit will regenerate oil to like new condition

Transformer Oil regeneration completed in your Transformer

If you are interested in obtaining more technical information about [FILTERALL's RPA unit](#) please ask for [FILTERALL Specification 214](#).

When asking for [FILTERALL](#) technical specification please could you provide the following information.

- *Contact Person
- *Full address
- *Contact details such as telephone, fax, e mail details
- *Activities of company
- *Type of Oil purification plant you currently own.
- *Volume of transformer oil you need to regenerate per day / 24 hours.
